

Don't risk the security of your house or workplace with old alarm systems!

Operating through the cloud solely using your camera and internet without any additional equipment, EyediUS Assistant provides a unique security service to its customer thanks to its advanced technology.

EyediUS Assistant, is the most advanced alarm and warning technology thanks to its footage interpretation which continuously monitors the footage from your camera and detects humans, keeping your house and workplace safe with real-time warnings.

# Why Eyediis Assistant

## RELIABLE

### FALSE ALARMS A THING OF THE PAST

Don't get upset by old technology products operating based on movement and generating false alarms at a rate of 94%. Monitoring footage 24/7 and separating objects with its smart algorithm, with Eyediis Assistant receive warnings only in cases of dangers you specify.

### PETS ARE NOT DETECTED AS DANGER

Detecting humans and generating warnings with footage interpretation technology, Eyediis Assistant does not generate false warnings as your pet roams freely.

## EFFICIENT

### NO ALARM BOX

With Eyediis Assistant, ensure the highest level of security simply through your camera and internet, additional equipment costs such as alarm box, sensor, cabling are eliminated.

### COMPATIBLE WITH ALL CAMERA BRANDS

You don't have to change your cameras along with your security system! Eyediis Assistant is compatible with all camera brands.

### CLOUD TECHNOLOGY

Instead of high price and long term contracts required by low technology alarm systems; prefer a cost-efficient and eco-friendly structure that you can access anywhere and pay as you use with flexible costs. Have a continuously updated and accessible system.

## MODERN AND COMFORTABLE

### ONLINE PURCHASE EASE

You can easily purchase Eyediis Assistant for your house or workplace through our website and start using it within minutes thanks to its user-friendly interface.

### SPECIAL FOR YOU

Don't let your security be the limited with single type alarm systems provided to all. With the scenarios you define specifically for your security need, receive quickly notifications even in varying or intense environments.

### ALARM WARNING BOTH ON SITE AND IN YOUR PHONE

In case of an alarm, be instantly informed with a notification message sent to your mobile devices wherever you are. As an alarm goes off at your location, you can call those who may be concerned and take quick action with a single button.

### COMFORT BESIDE YOU

Create more comfortable and modern spaces using new-generation technological solutions providing advanced technology security.
