

Eyedijs Pass, is a mobile application that provides entrance-exit control through mobile facial recognition with front cameras of smart phones or tablets.

You can go through facial recognition simply by looking at the camera on the application and quickly and securely pass through systems such as gates and turnstiles.

You can use Eyedijs Pass in your building - office entrances, turnstiles or folding doors. And you can create a location-based virtual entrance or exit outdoors.

Why Eyedius Pass

RELIABLE

TECHNOLOGICAL SHIELD

Use Eyedius Pass instead of passing systems such as card, password or bluetooth, which are compromised at high rates. Maximize your security with its robust structure. Let your password draw its strength from the uniqueness of your face!

NO CONCERNS FOR AMBIENT CONDITIONS

Don't let the ambient conditions in fingerprint pass systems such as wet, calloused or dirty fingers slow you down. With Eyedius Pass, ensure higher security and performance over other pass systems.

EFFICIENT

LOWER HARDWARE COST

With Eyedius Pass, minimize the cost of reader sensors placed at every control point. Replace physical sensors with virtual sensors that operate fully on the cloud.

BUDGET AND ENVIRONMENT FRIENDLY TECHNOLOGY

Instead of clunky entrance cards with failing magnetics that are constantly lost and must be updated regularly according to the number of users, prevent the increase of technological waste and contribute to the environment with Eyedius Pass.

MORE EFFICIENT BUSINESS

Completely eliminate business operations such as the production of pass cards, chips and identification and tracking of authorized card holders.

INSTANT REPORTING

With the "uncompromisable structure" of facial recognition technology, be informed of people entering-exiting a space during the day in the most accurate and reliable way.

MODERN AND COMFORTABLE

NO MORE LONG TURNSTILE LINES

No more long turnstile lines in building entrances as people look for their cards or forget them. Experience the quicker pass with Eyedius Pass.

NO MORE KEEPING MULTIPLE CARDS

You don't have to keep separate entrance cards for your office and home! You can have more secure entrances-exits by using your cell phone instead of large cards.

COMFORT BESIDE YOU

Create more comfortable and modern spaces using new-generation technological solutions.
